

It would seem that it has been forgotten that there ever was a Protestant Reformation which rightly determined that the church of Rome is the great whore and false church of the Book of Revelation chapters 17 and 18 which is full of abominations and filthiness of her fornication {sodomy, pedophilia, etc.}, and that the pope is the man of sin or antichrist who is full of the names of blasphemy, such as holy father, the Name Christ used to address God the Father Who alone is holy, and which Name should never be applied to a mere man; as well as head of the universal church which is Christ's sole prerogative.

It is also a gross misrepresentation for politicians and media to refer to the church of Rome as a Christian church when in reality it is a pagan system that uses Christian terminology to deceive the simple. We see this by the fact that the term pontiff is used to refer to the pope which is short for the title pontifex maximus and refers to the high priest of the pagan mystery religion of ancient Rome. This is the true identity of the papacy.

It is also ridiculous and tragic to see those claiming to be Bible believing Christians talking about the antichrist as being some single individual who will appear at the end of this age, when the origin of this futuristic teaching is Francisco Ribera, a 16th century Jesuit priest who invented this doctrine to counteract the Reformation and to rescue the pope from the charge of being the antichrist.
