

Only God Masters the Future

(January 23, 2023)

Well, unless you've been living in a cave for the past few decades, you know that a few multi-billionaires and their purchased minions (Pharma, Media, Medical establishment, etc.), are attempting to build a new order throughout the world like many of us would build a puzzle on the kitchen table. The difference of course, is that while they may have what they *think* is an accurate and full proof plan of what the world will look like when they get done, it's seriously doubtful it will resemble their pictured plan. Unlike a tabletop puzzle, there are way too many variables when attempting to completely redesign the world. But stop and consider the level of hubris involved to undertake such a feat. Reminds me of Satan's "I will be like the Most High," (**Isaiah 14:14**), though a created being like the rest of us.

In fact, the elite are so deluded that over the years, it seems they could not help but foretell what they envisioned the future to look like. Most science fiction movies produced, often show some type of dystopian future where humanity is in trouble from powerful forces. When all seems absolutely hopeless, a human "savior" rises to set things right. Those are movies only. In real life, there is no human being who is going to step up to save the world from the growing tyranny and fascism. Instead the world will fully embrace both of those things when some now-unknown guy rises to the top and rules the world during its final seven years of human-led history.

The coming Antichrist (empowered by Satan), and his final one-world government is why the world is moving toward full-on globalism (aka the great reset). Satan's goal since the fall of humanity has been to keep what he stole from Eve and Adam. Working through the Antichrist will be his greatest (and final), attempt to keep it all and subjugate the world as supreme ruler. Imagine this in movie form.

But the coming Antichrist and his final one-world government is why we are experiencing what we are dealing with for some time. Satan's goal since the fall of humanity has been to keep what he stole from Eve and Adam and working through the Antichrist will be his greatest (and final), attempt to keep it all and subjugate the world. Satan knows he cannot go against God by himself so he has to secure the loyalty and following of as many human beings as possible. These along with his own fallen angels will do their best to actually *resist* the physical return of Jesus! Such pomposity.

When you distill it down to its most plain and clear point, it is seen for what it is; a paltry attempt to overthrow the God of the universe and the deceived elite operate under the idea that it is possible. This is why elite multi-billionaires are attempting to take over the world in order to make life extremely wonderful for themselves while the rest of us will barely subsist (if they have their wishes). Many people will die but that's fine with those elite billionaires. We're just in the way.

Yet, I find it fascinating that extremely wealthy and powerful people are not simply content with their current level of power and wealth. Like drug addicts, they seem to always be looking for the next "fix," forever driven to follow their lust for the most power they can amass. What is power though unless it can be wielded against those who are not as powerful? It's as though they need to remind themselves constantly that they are "powerful," and if they don't exercise that power regularly, they are just ordinary (albeit extremely wealthy), people. Boring.

Let me list a few things that show us how (and for how long), these elite billionaires have been working to destroy our way of life so that we will be forced to enter their planned "dystopian future." Add these to the things I've already listed in previous articles.

The best way I can explain the coming world envisioned by the elite is to point to the movie *Alita: Battle Angel*. [1] In that movie, an extremely opulent and wealthy city of elites called Zalem floats above the planet, upon which poor average people live in their city below known as Iron City. Everything considered garbage gets tossed from Zalem and lands on Iron City below, because, you know, the elite cannot be bothered with things they no longer need and they don't want to ruin *their* paradise. The goal of the people living in Iron City is to somehow manage to be granted admission to higher social echelon of Zalem (something that cannot happen in our world).

Here are two additional things elites have been trying to put into place to ensure their supremacy and control. Their arrogance compels them and they remain blind to any real pitfalls ahead. They believe their computerized or AI tabletop exercises have covered all bases though programmed by imperfect and fallible people.

However, it's not that easy. In fact, an article posted on Zero Hedge a few days ago (author, Robert Blumen; thanks to the reader who sent the link), noted what appears to be more like the actual reality that *will* occur. If true, it seems those poor elite multi-billionaires will fall seriously short. [2] Blumen makes some excellent points in his article (though wordy), about how things may end up due to the negligent audacity of mental midgets with tons of money (i.e. Gates is going to "dust" the sun, etc.), and is worth the read.

1) **Gorgon Stare** - Gorgon Stare is literally the "eyes in the sky" that author Arthur Holland Michel writes about. This is where drones (using *Wide Angle Motion Imagery* or WAMI allowing for greater collection of highly detailed information), are used

high above the earth to see what is happening in cities and other areas far below. Drones with WAMI become super surveillance operations 25,000 feet above the earth and capable of zooming in on one person to watch their movements and even determine their identity.

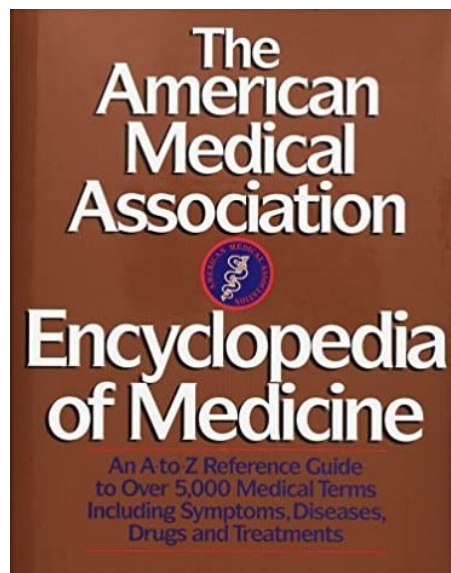

Michel got the idea for his book from the movie, *Enemy of the State*, where an imagined satellite technology existed that was capable of watching people on the earth across large areas. Funny how often futuristic movies seem to be a portend of some new technology that *is* ultimately created, isn't it? Maybe it's all just a coincidence...though that technology *did* come into existence and is being used now, however most are unaware that it was created and being used now. I only learned of it a few days ago. Many folks though, would not care because they would say, "Well, I've got nothing to hide," which has nothing to do with anything. If people are being illegally surveilled under the guise of trying to catch terrorists, we truly have lost our freedom to move about the country freely and anonymously. We are being digitally imprisoned.

Do you see how elite billionaires might crave this type of technology as their meaty fingers sweat with delight? It would play right into their money laundered hands and further tighten that noose so to speak around the populace so that at any time, anyone could be located and their comings and goings recorded. This is part of how globalists are creating that new world order by circumventing national sovereignty. If you can spy on everyone, you have gained control over them already. Without this type of massive surveillance, a one-world final government really couldn't exist.

2) **ICD-10** - Investigative journalist Leo Hohmann writes about this subject. [3] Most are aware that for decades, doctors and hospitals have used specific coding on the forms they complete and submit to insurance companies for approval and payment of services. These are International Classification of Disease (ICD), codes.

Recently, a completely new set of codes has been created and implemented. The new code is *Code Number Z28.310* [4] and it is interesting because it specifically refers to a person's COVID vax status. So when you go to the doctor, they'll continue to ask you if you've had the jab and in the future (depending upon your state), your response could be forwarded to the insurance company. Why? Well, the insurance company wants to know and they're willing to pay a "reward" to the doctor's offices that provide that "meaningful" information.

In reading about this, it also struck me as odd when I learned that when they take your blood pressure, pulse and temperature before you see the doctor, that info is also sent to the insurance company and doctors reap additional payments for that. In essence, insurance companies have incentivized doctors and medical staff to gather "meaningful" information by asking patients probing questions. This information, once provided to the insurance companies, can also go directly to the federal government through the

Medicaid and Medicare systems. "That means they get financial payouts whenever the government decides there's a 'meaningful use' for this data." [5]

This system appears to be the way the military-industrial-biomedical complex will identify and separate out those who have submitted to their digital identification system, which starts with being "up to date" on your shots — endless shots. As the late Dr. Zev Zelenko and others have said, these continuous boosters will become a "gateway to transhumanism." [6]

Elite billionaires are, to put it bluntly, doing everything they can to build invisible prisons around us, pushing us into smaller and smaller circles of movement. Because these things have been in the works for many decades, the possibility of stopping them is extremely low. The elites have amassed too much power and wealth allowing them to buy off the people (or get rid of them), they need to do their dirty work. That power and wealth comes directly from Satan and the willingness of elites to sell their souls to him. However, let's be clear that God *allows* it and He does so for *His* purposes and ultimate glory.

Application

So what do we do? What does this mean for us and how do we respond? We can look at this with abject fear and anger or we can choose to understand and know that God is fully in control. I believe events leading up to the coming Tribulation (whenever it is slated to officially start; I have no clue and neither does anyone else), will happen incrementally, just like building a puzzle. However, the start of the Tribulation will be an event that catches the world's attention (e.g. the *confirming* of the covenant already in place, **Daniel 9:24**). This appears to be God's plan.

Piece by piece, things will be put into place allowing elite billionaires (and ultimately Satan), to have and exercise nearly absolute control over society *globally*. This is being made possible largely because of the Internet, which in and of itself is not bad, but can certainly be *used* for bad, just like fire (cooking or destruction). Once the Internet was created, we began speeding toward the start of the Tribulation.

So if God is allowing all of this to happen, what should our response be? Looking at the Israelites in Egypt is a good place to start (**Exodus 7-14**). Then, Pharaoh of Egypt made life very difficult for the Hebrews. Pharaoh did so because he was afraid of the Hebrews since they outnumbered Egyptians. Egypt needed the Hebrews to be their workforce but when Pharaoh realized they were a large enough group to join an outside force and fight against Egypt, he grew very concerned. The old game of thrones thing.

In today's situation, elite billionaires are pushing the world toward their takeover (referring to it as first, the Great Reset, and now, a need to "Master the Future"[7]), and it is clear that they want everything to be in place by 2027 (originally 2030). Again though, it is God who is in charge of that date and He will or won't allow it, based solely on His will in the matter. I believe Satan protects these elite as long as they continue service to him, which is why many of them live to be very old people. To think we can overcome them through voting or even a civil war is really absurd.

So if God *IS* in control, what do we do? Several things. First, we trust Him above all things, even when we cannot see clearly. This may require work on our part; an effort to give up the things that weigh on us and trust Him for His outcome. Second, we continue to live our lives. This is a huge proverbial smack down to the handful of elite billionaires. By living our lives, we show them we are not afraid nor will we be bullied. Let them do whatever they think they can do to gain power over the world. We, however, will continue to celebrate the life God has given us and we will do that by getting together with other Christians in fellowship, enjoying family time, taking trips for relaxation and more. Third, we need to become people of *praise*. There is no greater thing we can do than to praise God for His expected provision, wisdom, discernment and strength. Often, we might need to offer a sacrifice of praise (**Hebrews 13:15**), when we don't necessarily *feel* like it. Sometimes, this is all I can do even though my heart isn't in it, though it usually comes along.

The biggest upset to the elite is to live the way we lived *before* CV. What did we do then? *We lived!* We enjoyed doing the normal things in life and we should absolutely still do that; going to church to fellowship with other believers, enjoying family gatherings, hiking in God's Creation, etc. Unfortunately, I know too many people who remain in fear of CV or other diseases. They refrain from being with groups. They wear masks and clean everything in their home with alcohol even if they live alone. They are generally afraid to go out because they'll be around germ-carrying people who might pass some illness to them. They fail to realize they are weakening their own immune systems by doing this.

The rest of us absolutely need to get back to daily living the way we enjoyed before even though that will likely become more difficult in 2023 and beyond. We need to understand that the elite billionaires are not going to stop pushing, pulling, mandating and building. However, we *can* ignore it. While we cannot do anything about the "eyes in the sky" or the new ICD codes, we can live like those don't exist. We can politely refuse to answer questions at the doctor's office about whether or not we've been vaxed. We can shut off the fear surrounding CV by ignoring it. I'm not saying to be stupid. If you know someone is sick, keep your distance. If you're sick, stay home until you feel better.

In the meantime, we need to look less at the problems in this life and look more to the Problem Solver. While we should do what we can to prepare for things, we cannot plan for every possible eventuality and most of us do not have the financial resources to do so. While it is good to know what is happening in life, allowing it to cripple you with fear is the very antithesis of what God wants for us.

Read His Word daily. Memorize Scripture. Repeat to yourself often. Praise Him for all things that come your way. Only God has mastered the future.
