

(2-14-16)

FRANKEN-FEMI-NAZIS!:
(CHEMICAL CROSS-DRESSING!)

2 Timothy 3:13 But evil men and seducers shall wax worse and worse, deceiving, and being deceived.

John 10:10 The thief cometh not, but for to steal, and to kill, and to destroy: I am come that they might have life, and that they might have it more abundantly.

3 John 1:2 Beloved, I wish above all things that thou mayest prosper and be in health, even as thy soul prospereth.

Matthew 13:25 But while men slept, his enemy came and sowed tares among the wheat, and went his way.

1 Peter 5:8 Be sober, be vigilant; because your adversary the devil, as a roaring lion, walketh about, seeking whom he may devour:

Luke 17:28 Likewise also as it was in the days of Lot...

Isaiah 3:12 As for my people...women rule over them...

-ESTROGENIC EPEDEMIC! (2015)

-*PLASTIC SOLDIERS: THE FEMINIZING DANGERS OF MODERN DIET AND ENVIRONMENT* (2012)

"Perhaps **by means of injections and drugs and chemicals** the population could be induced to bear **whatever** its scientific masters may decide to be for its good."
(Bertrand Russell, *Scientific Outlook*, 1931)

"...every government...will be able to control its subjects securely without the need of armies or policemen."
(Bertrand Russell, *The Impact of Science on Society*, 1953)

"I think the subject which will be of most importance politically is **mass psychology**...Its importance has been enormously increased by the growth of **modern methods of propaganda**...Of these the most influential is what is called 'education'...the press, the cinema, and the radio play an increasing part...It may be hoped that in time anybody will be able to persuade anybody of anything if he can catch the patient young and is provided by the State with money and equipment...The populace will not be allowed to know how

its convictions were generated...**Diet, injections, and injunctions will combine**, from a very early age, **to produce the sort of character and the sort of beliefs that the authorities consider desirable**, and any serious criticism of the powers that be will become psychologically impossible..."

(Bertrand Russell, *The Impact of Science on Society*, 1953)

"...there is the possibility of **substantially altering the intellectual and moral natures of individuals** by some sort of **hormonal injections**; already great effects have been produced on animals."

(Charles Galton Darwin, *The Next Million Years*, 1952; grandson of Charles Darwin)

"...fertility is merely a nuisance...we allow as many as thirty per cent of the female embryos to develop normally. The others get a dose of male...hormone...Result...they're...structurally quite normal...except...they do have the slightest tendency to grow beards...but sterile...'We also predestine and condition...as future sewage workers...or future ...' He was going to say 'future World controllers...!'"

(Aldous Huxley, *Brave New World*, 1932)

-BPA was shown to be an environmental estrogen in 1936, **long before** it was first used in plastics. Prof vom Saal said that some effects are seen at extremely low doses in animal studies - even below one part per trillion:

"The endocrine system is designed to function at very, very low concentrations, in like parts per trillion...Parts per trillion has been compared to a drop of water...in 20 olympic size swimming pools...They build up in our fat...[linked to]...infertility...obesity...diabetes...autism...men with [feminine chests]...So many things [contain] 'fragrance' these days. And we really don't know what's in fragrances. They're not required to tell us...And they often contain pthalates, which are endocrine disruptors. They're actually designed to carry the scent into your body...a direct route...cleaning products...and laundry products...and dryer sheets, and all these things...and it is not that hard to avoid...people just aren't choosing [the other options]...so much of what we buy is plastic...I have children, and I want to protect them..."

(Dr. Carol Kwiatkowski, Executive Director of The Endocrine Disruption Exchange)

"...some recent studies have even found that when BPA interacts with hormone receptors on cell membranes [it can affect us at] **concentrations of one part per trillion...**"

(www.scientificamerican.com/article/just-how-harmful-are-bisphenol-a-plastics/)

"More Americans are on psychiatric medications than ever before...Sales of

antidepressants and anti-anxiety meds have been booming in the past two decades...As a psychiatrist practicing for 20 years, I must tell you, this is insane. At least one in four women in America now takes a psychiatric medication...If the serotonin levels of women are constantly, artificially high, they are at risk of losing their emotional sensitivity with its natural fluctuations, and modeling a more **masculine**, static hormonal balance."

(*New York Times*, Feb. 28, 2015)

"These estrogens, shockingly enough, change women's gender and sexual orientation and make them BEHAVE MORE MASCULINE! These substances are behind the exploding rates of...[cancers]...fibroids, PCOS, female infertility, miscarriages..."

(Curtis Duncan, Natural health researcher)

"...different kinds of endocrine disruption have been described in fish...**males develop female-like** characteristics...[But!] **females develop male-like** characteristics...[Not only physical changes in the females...but] male-like courtship behavior toward other females...[And] males...had a decrease of masculinity...at the same time...More heavily contaminated male bears have lower blood testosterone levels (Oskam et al. 2003)...How much data will be enough for biologists to insist that endocrine disruption is a serious threat to wildlife?..."

(*Subtle sabotage: endocrine disruption in wild populations*, 2006;

<http://www.redalyc.org/html/449/44921046002/index.html>)

"...behaviors in female rodents have been shown to be **masculinized by exogenous estrogens** (Ryan and Vandenberg 2006)..."

(*Environ Health Perspect.* 2009 Dec; 117(12): A531–A532)

"The problem is, BPA is also a synthetic estrogen...the CDC has found BPA in the urine of 93% of surveyed Americans over the age of 6."

(*TIME Magazine*, "The Perils of Plastic")

"...even from **unheated plastic** there is a significant increase in chemicals, such as BPA, that occurs when students were tested before and after drinking water from Nalgene BPA-containing bottles."

(Personal E-mail from Dr. Frederick vom Saal)

"...An estrogen-treated female placed in close quarters with a male mouse would attack the latter before any attempts at mating had a chance to begin."

(<http://io9.gizmodo.com/yes-theres-a-masculine-side-to-estrogen-1683913461>)

-BPA at extremely low doses caused male and female rats to switch normal behavior concerning fear and emotion:

(Kubo, K, O Arai, M Omura, R Wantanabe, R Ogata, and S Aou. 2003, Neuroscience Research, 45: 345-356)

"...Kubo *et al.* found that exposure to BPA *reversed* the sex differences [in brain]...suggesting that BPA caused both **demasculinization** of males and **defeminization** of females..."

<http://www.ourstolenfuture.org/NewScience/oncompounds/bisphenola/2003/2003-0411kuboetal.htm>

- A 2011 study revealed that when participants ate canned soup, they experienced more than a 1,000 percent increase in their urinary concentrations of BPA.

-A 2009 study found that drinking from plastic bottles increased urinary BPA levels by two thirds.

-Extraction of BPA from fingers is possible up to 2 hours after exposure:
("Transfer of bisphenol A from thermal printer paper to the skin," *Anal. Bioanal Chem* 398)

-Receipt (and recycled paper) residues on hands can be ingested ("Bisphenol A Action Plan" (PDF). U.S. Environmental Protection Agency. 29 March 2010. Retrieved 12 April 2010.)

XENO-ESTROGENS, HIGH BLOOD SUGAR, AND MASCULINE WOMEN:

-...BPA has been shown to alter glucose and lipid metabolism in animal studies...Alonso-Magdalena, P; Ropero, AB; Soriano, S; Quesada, I; Nadal, A (2010). "Bisphenol-A: a new diabetogenic factor?". *Hormones* (Athens, Greece) 9 (2): 118–26. PMID 20687395.

-A 2006 animal study revealed a link between **environmental estrogens** and **insulin resistance**...leading to type 2 diabetes and high blood pressure.

"Insulin resistance is one of the root physiological imbalances in most, if not all, PCOS...**High insulin levels** can tell the ovaries **to make more testosterone**."
(<http://health.clevelandclinic.org/2015/11/polycystic-ovary-syndrome-pill-not-remedy/>)

[See also <http://care.diabetesjournals.org/content/26/10/2966.2.full>]

-In deer mice...Male spatial navigational ability was found to be disrupted by early BPA exposure...Female mice chose the male mice with no BPA exposure!

-A study from 2013 suggests that exposure to BPA may lead to lower mate guarding...

"...researchers in the UK and Greece discovered up to 50% more of the chemical in the bodies of women with PCOS...They linked BPA with **testosterone levels** and insulin resistance..."

(Christine DeZarn, Polycystic Ovarian Syndrome Association, Inc.)

"BPA affects male rat fertility for generations...The rat study tested relatively low levels of BPA chosen to fall within the range of human exposures...BPA during development can compromise female fertility..."

(<http://www.environmentalhealthnews.org/ehs/newscience/bpa-compromises-male-fertility-across-generations>)

"...endocrine-disrupting chemicals (EDCs) have 'gender-bending' qualities...in a number of British rivers, 50 percent of male fish were found to produce eggs...**Phthalates** are another class of gender-bending chemicals that can 'feminize' men...Phthalates are found in vinyl flooring, detergents, automotive plastics, soaps and shampoos, deodorants, perfumes, hair sprays, plastic bags and food packaging...**Bisphenol-A (BPA)**...**Bovine growth hormones**...**soy products**...**MSG**...**Fluoride**...**Teflon cookware**...**cleaning products** loaded with chemicals, artificial air fresheners, dryer sheets, fabric softeners, vinyl shower curtains, chemical-laden shampoos, and personal hygiene products. Replace them all with natural, toxin-free alternatives..."

(<http://www.mercola.com/testosterone.aspx>)

-In 1957, Dr. Hamburger [who helped ex-GI George Jorgensen become 'Christine']...said that men who ate hormone-treated food may develop feminine characteristics...He found that the hormones were not destroyed in cooking.

"*Why boys are turning into girls - Gender-bending chemicals...*"

(Telegraph.co.uk)

-95 percent of all plastic products tested positive for estrogenic activity - even if they carry a BPA-Free label.

"**According to modern-day analyses, many of the plants historically noted for their ability to prevent pregnancies or cause miscarriages contain phytoestrogens** and other hormonally-active substances...A group of captive cheetahs experienced infertility while on a diet rich in soy (Setchell et al. 1987). When the soy was replaced with corn, their fertility was restored..."

(<http://e.hormone.tulane.edu/learning/phytoestrogens.html>)

"The fact that **soy** can **feminize males** and **masculinize females** is evidence of soy targeting the brain..."

(<http://www.westonaprice.org/health-topics/why-babies-should-not-be-fed-soy/>)

"...health researchers...believe that supplementing with phytoestrogens plays a reverse role: instead of increasing estrogen activity [in women], **the increased phytoestrogen load...tells the body to stop producing its own estrogen**, which ultimately results in a **decline in estrogen-related power** in the body...."

(<http://paleoforwomen.com>)

-PCOS, Acne, Excess body hair, MOOD DISORDERS, Infertility, increased inflammation in body - all associated with high levels of male hormones. (And when they did have children, their little girls were especially aggressive):

"...The study found that **BPA**, a known **hormone disrupter**, is elevated and associated with **higher levels of male hormones** in the blood of women with PCOS...as the BPA blood level increased, so did the concentrations of the male...hormone testosterone and androstene-dione, a steroid hormone that converts to testosterone..."

(<https://www.endocrine.org/news-room/press-release-archives/2010/women-with-polycystic-ovary-syndrome-have-higher-bpa-blood-levels>)

"...**Is BPA a Hidden Cause of PCOS and Excessive Male Hormones?**...The evidence is in...**the higher the BPA, the higher the male hormones and insulin resistance are**...the [BPA] exposed female rats had much reduced fertility. Also, their ovaries had large numbers of ovarian cysts...Reduce your exposure to BPA...detoxify..."

(<http://www.ovarian-cysts-pcos.com/pcos-bpa-infertility.html>)

"...human and primate **females** perinatally exposed to [DES, or synthetic estrogen] show a **masculinization of play behavior**...Early administration of **BPA** was responsible for a significant increase of exploration [in female rats]...as well as a decrease of play **with males...BPA...is able...to defeminize** some aspects of female behavior..."

(Brain Research Bulletin 65 (2005) 261–266; *Early exposure to a low dose of bisphenol A affects socio-sexual behavior of juvenile female rats*)

"We're not gender confused. We're gender manipulated! There's a difference...You can masculinize women's brains, and have them acting like males, and dressing like males. You can feminize men's brains...It's a proven fact...A lot of these chemicals are a result of the petroleum monopoly around the world...They are petro-chemicals...You can see the link between the Rockefellers and the eugenics agenda, and these chemicals. The Rockefellers were the oil men...They created the chemicals to achieve ...population control...human engineering...Pesticides are chemical warfare agents...We don't need to

be using chemical warfare agents on our food...[Monsanto] wants to push GMO's so they can sterilize the world...It all makes sense now!...Men today...something's wrong with men!..."

(Curtis Duncan, "The Conspiracy to Feminize Males & Masculinize Females," 2012)

"The chemical alteration of humanity is one of the most threatening issues we are facing...It is happening right now."

(Lana Lokteff; Radio host)

"*Bisphenol A Makes Girls Mean*...So now we know what happened; Mom ate too much canned tomato sauce [BPA can lining]...According to a new study, prenatal exposure to Bisphenol A (BPA) makes little girls as mean and aggressive as little boys...Bisphenol A was originally proposed for hormone replacement therapy in the 1930s because it was so close to estrogen...In *USA Today*, neurobiologist Louann Brizendine, author of *The Female Brain*, says: 'In the developing brain, timing is everything,' Brizendine says. 'I'm worried that tiny amounts of this stuff, given at just the wrong time, could partly masculinize the female brain'..."

(www.treehugger.com)

"*New Study: BPA May Make You Stupid and Depressed*...a new study reports that researchers from the Yale School of Medicine...exposed African Green monkeys...to low levels of Bisphenol A for a month. They found that even low doses of BPA slow down the synapses in the brain...in the regions of the brain important to learning...According to *Medical News Today*, This synaptic loss may cause memory/learning impairments and depression..."

(www.treehugger.com)

-Heavy metals often also have destructive, **estrogenic effects**:

"*Mercury Poisoning Makes Birds Act Homosexual*...Male birds that eat mercury-contaminated food show 'surprising' homosexual behavior, scientists have found...Mercury is a known endocrine disruptor..."

(*National Geographic News*, 2010)

"One of the most common weed killers in the United States can make male frogs lay eggs, a new study says...and even change their mating habits by choosing males over females...ten percent [of the male frogs] developed into what looked like perfectly normal females."

(*National Geographic News*, 2010)

"The estrogens in **clover** have been known for several decades to have a contraceptive action in sheep...[they result in] **feminization of men**...as well as functional **masculinization of the female brain**. (Register et al., 1995; Levy et al., 1995; Clarkson et al., 1995; Gavalier et al., 1995)..."

(Ray Peat, *The Dire Effects of Estrogen Pollution*)

"...**wild fish**...are being nailed by polluting hormones [from beef or dairy farms]...**with males becoming somewhat feminized and females somewhat masculinized**...it's highly likely that what we're seeing in these wild fish is...**derived from the farm use of these [hormonal] agents.**"

(*Science News*, "Hormones: Here's the Beef - Environmental concerns reemerge over steroids given to livestock")

"High isoflavone [phyto-estrogen] intake...decreases estrogen production."

(Maida Taylor, MD, MPH, Associate Clinical Professor, Department of Reproductive Sciences, Obstetrics and Gynecology)

"Women on the Pill Choose Less Manly Men..."

(www.livescience.com)

"Dr. Thompson said, noting that, as in cases of many other hormones, the administration of **artificial doses** may cause temporary later decrease of activity in the gland where the hormone normally would originate."

(*The Cincinnati Enquirer*, February 16, 1949)

[Additional help for women: Spearmint/peppermint tea...Motherwort...Saw Palmetto...Licorice root...Beetroot...Dandelion root]
