Introduction to Creation

1/30/2022

How did this world begin?

What is your source of belief?

How does one's belief regarding how the world began impact the way they live life, decisions that they make...?

We must conclude that our belief about the origin of life will critically impact how we live life and view death

What places can you go to that will presume you believe in evolution?

While creation doesn't oppose science and is in fact supported by science, creation is still a matter of faith – just like evolution

What are some of the key passages that teach creation?

God does not ask us to believe in what we think happened (no one was there), but He asks us to believe what He said about creation
